

Mechanical Engineer

Full-Time

South Bay, Los Angeles

DMF Lighting is looking for a talented mechanical engineer with experience with product design and structural and thermal analysis. The candidate must have interest in the product development processes from conception to detail design of parts and assemblies, create drawings, perform thermal and optical testing, and work with manufacturing team through the tooling stages.

We have a lean Engineering team made of smart and dynamic professionals from top universities and they have great enthusiasm towards solving worlds challenging problems from human's daily interactions at home or office to conserving energy and sustainable manufacturing.

Requirements

- 2 years of experience in Mechanical Design
- Professional with Solidworks or Creo
- Hands-on experience in course/personal projects and workshops
- Bachelor's degree in Mechanical Engineering
- Knowledge of die-casting, extrusion, and sheet metal processes is a plus
- Excellent communication skills

DMF Lighting

Our in-house R&D lab is filled with brilliant engineers always at work improving our products and inventing new ones. They understand that light is more than illumination; it is what makes a space beautiful useful and ultimately livable. DMF engineers create products that deliver exceptional performance and aesthetics while also saving you time and money year after year. That same ethos animates every part of our company from our tireless customer service to our fast, intelligent distribution. Founded 30 years ago in Southern California, today DMF is a major lighting manufacturer dedicated to pushing the limits of LED lighting technology. DMF offers an excellent compensation package including a flexible schedule, paid vacation, healthcare, 401k, all within an energizing environment and family-like culture.
